

Pacific Health Systems

We know that choosing a home health care provider can be confusing. We also know how critical that decision is. For your family or for someone you love, you need all the information you can get and comparative data that will help you make a sound decision. **Pacific Health Systems** is here to help make this critical choice easier. You can count on us to provide you with qualified professionals who will meet your expectations for home health care.

Home Health Care is a manner of approaching a patient's needs through nurses and care professionals. Services are provided at home instead of a care facility or the hospital. Upon the recommendation of a physician, the patient may receive home health care and benefit from less costly care services, more flexible visit schedules from nurses and most importantly, enjoying the company of their loved ones at home.

Healing and better health can truly be achieved at home. Ask us how! Call **Pacific Health Systems** at **678-782-2474** and learn more about your home care options with us.
